

## Online File Transfer For Construction Documents Just Got Easier

..And faster! PlanSource FT is our powerful file transfer service for construction documents that leverages the best features from our industry leading PlanSource Premium.

In about a minute you can get set up and start using your FREE account to distribute and manage documents for the design, bidding or building of your project. PlanSource FT is a fully hosted software service saving you the challenges of managing expensive internet infrastructure.

For construction professionals having an effective way to share or distribute documents is essential. PlanSource FT streamlines processes like printing and distributing sets of paper, sending email attachments, distributing DVD's and using ftp sites into one comprehensive system. Whether it is digital plans, specifications, addenda, minutes, RFI's, shop drawings or any other document you simply drag and drop them onto the project folder, distribute the Access Key to the people you want to have access to the documents for that project and your job is done. The people who have access can immediately start to view or work with the documents as they need for their purposes.

### FEATURES

#### Multi-function Viewer

Quickly access and work with all documents. Onscreen measuring, redlining and annotation make it easy to get your work done

#### Multiple File Formats

Post and transfer any file format you work with

#### Automated Version Control

New versions of documents are automatically tracked and managed ensuring everyone is working from the correct one

#### Easy Upload

Use our drag and drop technology designed for complex construction documentation

#### Securely Share

Control access by using our secure Access Key technology eliminating the administration of users and passwords

#### View, Download, Print

Let others view, download, print, or get printed copies with just a few clicks
