

PlanSource
On Demand Document Control

Subscription-based automated digital document access, review, delivery, notification and receipt system for construction projects

"We recently bid 10 projects in a two-month period...Never in the history of Teck have we done that volume of bidding in that short a time."

George Tecklenborg,
Teck Construction

PlanSource is designed specifically for the document delivery and access needs of the construction industry. Whether you're a developer or general contractor, project manager, estimator, planroom operator or architect, and involved in the private or government sector, PlanSource can reduce the time and costs associated with distributing and tracking the large volume of project documents related to construction projects.

Now, everyone involved with a specific project will be up-to-date and current with the multitude of project documents that are essential for managers, trades, suppliers and consultants. Starting to use PlanSource is easy and intuitive as it emulates current paper-based processes that you already know and have established. Using PlanSource's secure system you'll quickly realize savings in time, reduced costs and increased accountability.

Save Time

Streamline your communications by eliminating the handling of large volumes of paper documents using reliable and rapid digital methods. PlanSource allows you to significantly reduce the time and effort spent on ordering traditional, printed documents. You'll notice a distinct improvement in the time saved and the reliability of digital document delivery. Now, you can bid more jobs and manage more projects using PlanSource's paperless system.

Increase Accountability

Ever wonder if a critical project document has been delivered AND opened? Using PlanSource you can improve overall project management by knowing exactly *Who* saw *What*, and *When*. By tracking the distribution of all project documents legal claims associated with document revisions and updates are avoided and projects stay on schedule. Plus, document recipients and senders alike will benefit by reducing search-time for project documents.

Reduce Costs

PlanSource absolutely guarantees you will realize significantly reduced costs from the printing, shipping and handling of all your project related documents. You'll have immediate access to your documents online through PlanSource's secure, access-controlled system. Whenever you do need to print documents, you can get them quickly and professionally printed and shipped through the network of professional reprographers who work with PlanSource's print ordering system. You'll also reduce the costs associated with project overhead by reducing time and effort required for document sign-off, printing and packaging of documents, as well as organizing couriers and reprographic houses.

PlanSource uniquely combines document and communications management to provide the power needed to expedite project document delivery while providing unparalleled record keeping and specialized workflows for automating key processes

Document Management
